

Tulsi Gupta

AL/ML Engineer · Full Stack Developer
ttulsigupta836@gmail.com · +91-9026154929 · [Linkedin](#) · [GitHub](#)

Summary

Backend Developer and AI/ML Engineer building intelligent applications, scalable backend systems, and automation-driven solutions using modern technologies. Focused on transforming manual workflows into efficient AI-powered pipelines, APIs, and real-world software systems for scalable digital products.

Projects

Space Biology Knowledge Engine - NASA problem statement 2025

- An AI-powered application designed to organize, retrieve, and analyze space biology research and scientific knowledge efficiently.
- Developed intelligent search and backend systems that transform complex biological and space-related data into accessible insights for learning, research, and exploration.

Smart QR Attendance 2025

- Developed a Smart QR Attendance System that automates attendance tracking using QR code scanning and secure backend verification.

SkyRecall 2026

- An AI-powered cloud storage and smart file retrieval platform using Python, Django, AI/ML, and vector search technologies.

Skills

Languages: C, C++, Javascript, Python

Backend: Node.js, Django, FASTAPI

Databases: MySQL, MongoDB

AI/ML: Machine Learning, Deep Learning, Artificial Intelligence

Tools & Version Control: Git, GitHub, VS code

Education

Malout Institue of Management and Information Technology — B.Tech, Computer Science & Engineering · CGPA: 8.13 · Expected 2027

Hackathons

- Participated in Smart India Hackathon (SIH), collaborating on innovative problem-solving and real-world project development.
- Participated in NASA Space Apps Challenge hackathons, working on technology-driven solutions, teamwork, and rapid prototyping.
- Participated in Agri Innovation programs focused on solving agriculture-related challenges through technology and innovation.

Certification & Achievement

- Secured 5th position out of 220+ teams, demonstrating strong problem-solving and data engineering skills. Recognized with a certificate for building an efficient system to structure and visualize data.
- Earned NCC 'C' Certificate demonstrating leadership, discipline, teamwork, and training excellence.

Interests

Sketching and Creative Design · Travelling · Technology experimentation
